

productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In addition, we generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all ASCs, physicians, and hospitals are considered to be small entities.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of title 5 of the United States Code. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

We propose to use the same rate determination methodology in establishing a payment rate for ESWL that we proposed in the December 31, 1991 notice (56 FR 67681). As reported in that notice, adding ESWL to the list of covered ASC procedures would result in an insignificant Medicare savings for payment of the service in an outpatient hospital setting. This saving could be offset by a small Medicare payment increase for a larger number of ESWL procedures performed in an inpatient hospital setting if hospitals shift some patients who could be treated in either setting from the outpatient department to the inpatient setting in order to maximize payment. Therefore, we believe this proposed rule does not meet the \$100 million criterion nor does it meet the other E.O. 12291 criteria. Since this proposed rule is not a major rule under E.O. 12291, an initial regulatory impact analysis is not required.

The median age of the Medicare beneficiary population is 73 and urolithiasis, or the formation of urinary stones, that could be treated with ESWL appears to be most common among persons ages 30 through 50.<sup>11</sup> It appears, therefore, that this is not primarily a condition that affects Medicare beneficiaries. According to our Medicare Part B Annual Data files, in 1990 only 24,382 ESWL procedures were performed on Medicare beneficiaries. Of that number, 56 percent were performed in the hospital

outpatient department and those claims represented only one-tenth of one percent (0.1) of provider bills to Medicare.

For that same year, BBI estimated that as many as 150,000 patients received ESWL treatment. Based on that estimate, Medicare patients accounted for 16 percent of those undergoing ESWL treatment. That ratio of Medicare to non-Medicare ESWL patients is supported by an October 1987 ESWL report prepared by the Medical Technology and Practice Patterns Institute (MTPI). It indicated that Medicare beneficiaries comprised about 16.2 percent of the total ESWL patients included in their study. The result was similar to a finding of an AHA survey conducted in 1986 that found that the Medicare share was 17.6 percent. However, a February 1991 study conducted by MTPI, involving six facilities that provided lithotripsy services, alleges that the current Medicare share of the ESWL caseload is about six percentage points higher (21.7 percent) than their 1987 finding.

We have not accepted this recent finding largely because we had not had the opportunity to determine and question the validity of the study data on which it is based. One of the primary weaknesses of the MTPI report about the study is that it neither discussed how the study facilities were selected nor provides demographic information about them. Without this type of information, we are unable to determine, for example, if the studied population is representative of the ESWL population and whether the study findings can be extrapolated to the general population.

We believe that the proposed new ASC facility Group 9 payment rate for ESWL, even if below the customary charge of some facilities, would not significantly affect the income of lithotripsy facilities that serve a normal ratio of non-Medicare to Medicare patients and that operate efficiently within optimal utilization levels. Thus, we have determined and the Secretary certifies that this proposed notice would not result in a significant economic impact on a substantial number of small entities and would not have a significant economic impact on the operations of a substantial number of small rural hospitals. Therefore, we are not preparing analyses for either the RFA or section 1102(b) of the Act.

### Public Health Service

#### Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection requests it has submitted to the Office of Management and Budget

(OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on September 17, 1993.

(Copies of the information collection requests may be obtained by calling the PHS Reports Clearance Officer on (202) 690-7100)

1. The Follow-up of Tuberculosis Patients Exposed to Multiple Chest Fluoroscopies—0925-0255—Former tuberculosis patients who were irradiated during their treatment will be asked to respond to a telephone questionnaire which assesses information about cancer and its risk factors, in order to estimate radiation risks. Respondents: Individuals or households; Number of Respondents: 2,200; Number of Responses per Respondent: 1; Average Burden per Response: .167 hour; Estimated Annual Burden: 367 hours.

2. The Prevalence of Alcohol and Other Drug Abuse and Dependence in Short-Term General Hospitals and the Impact of Abuse and Dependence on Hospital Utilization, Charges, and Costs—New—The NIAAA Hospital Study is a national survey of hospital inpatient admissions that will estimate the prevalence of alcohol abuse or dependence and describe its association with hospital costs and utilization. The survey will screen 5,482 and interview 2,985 inpatients in 96 sample hospitals. Respondents: Individual or households; State or local governments; Businesses or other for-profit; Non-profit institutions; Small businesses or organizations; Number of Respondents: 4,593; Number of Responses per Respondent: 3.33; Average Burden per Response: .338 hours; Estimated Annual Burden: 5,184 hours.

3. User Fee cover Sheet—New—The Prescription Drug User Fee Act requires pharmaceutical companies to pay a fee for each drug application and supplement submitted for approval. The user fee cover sheet (Form FDA 3397) provides a mechanism to determine whether the fee submitted with the application is appropriate. Respondents: Businesses or other for-profit; Small businesses or organizations; Number of Respondents: 435; Number of Responses per Respondent: 1.383; Average Burden per Response: .5 hour; Estimated Annual Burden: 301 hours.

4. Native American Data Collection and Analysis for the Hanford Environmental Dose Reconstruction (HEDR) Project—New—The dietary and life-style data to be collected will be used to estimate radiation exposure and to determine whether Native American

exposure differed substantially from that of the general population. Exposure estimates will then be used to determine whether a full epidemiologic study of thyroid disease specifically in the Native American population is scientifically justifiable and feasible. Respondents: Individuals or households; Number of Respondents:

3000; Number of Responses per Respondent: 1; Average Burden per Response: 1.50 hours; Estimated Annual Burden: 4513 hours.

5. Pediatric Gastroenteritis Patient Outcomes Research Project—New—This study will obtain treatment and outcomes data, which are otherwise unavailable, from parents of patients

and from pediatricians. Data will be used to describe variations in patterns of care, resources used, and outcomes of care in order to develop recommendations to guide future treatment decisions by medical personnel and parents. Respondents: Individuals or households, Small businesses or organizations, non-profit institutions.

Title	Number of respondents	Number of responses per respondent	Average burden per response (hour)
Providers .....	142	14.7	.4
Parents .....	1,680	1.98	.42

Estimate Total Annual Burden—2217 hours.

Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated below at the following address: Shannah Koss, Human Resources and Housing Branch, New Executive Office Building, room 3002, Washington, DC 20503.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-93-1917; FR-3350-N-51]

### Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact Mark Johnston, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708-4300; TDD number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A-10, 5600

Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the *Federal Register*, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (i.e., acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Navy: John J. Kane, Deputy Division Director, Dept. of Navy, Real Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332-2300; (703) 325-0474; (This is not a toll-free number).

Dated: September 24, 1993.

Jacquie M. Lawing,

Deputy Assistant Secretary for Economic Development.

Sec. 36, lots 3-7, inclusive, 7, 9, 15, 17 and 18.

The area described contains 607.88 acres in Elko County, Nevada.

The classification was made pursuant to the Desert Land Act of March 3, 1877, as amended and supplemented (43 U.S.C. 321, et seq.). Entries were allowed on June 4, 1985, and on that date the lands became segregated from all other forms of appropriation under the public land laws, including location under the mining laws. By decision dated June 6, 1989, the entries were canceled because of the entrypersons' inability to construct the necessary irrigation works and make final proofs within the mandated timeframe.

Pursuant to section 7 of the Taylor Grazing Act (48 Stat. 1272), desert land classification N-22427 and N-22428 are hereby terminated in their entirety.

At 10 a.m. on October 1, 1993, the lands will become open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to

10 a.m. on October 1, 1993, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. At 10 a.m. on October 1, 1993, the lands will be open to location under the United States mining laws.

Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law.

The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

K. Lynn Bennett,

Associate State Director, Nevada.

Reading copies are available at: BLM, Barstow Resource Area, 150 Coolwater Lane, Barstow; BLM, California Desert District, 6221 Box Springs Blvd, Riverside; San Bernardino County Government Center, 385 N. Arrowhead Avenue, Third Floor, San Bernardino; San Bernardino County Building, 15505 Civic Drive, Victorville; Newberry Springs; and libraries in Victorville, Barstow, and San Bernardino.

**SUPPLEMENTARY INFORMATION:** The Final EIR/EIS responds to comments on the Draft EIR/EIS concerning the probable environmental impacts that would result from the proposed construction and operation of a specified hazardous waste disposal and treatment facility. The proposed action consists of an aboveground disposal area located on private lands with a capacity of approximately 16 million tons, an 8.5 mile 60-foot wide right-of-way for an access road located on public and private lands, and the mining of 10.4 million tons of coarse borrow material on a 363 acre public lands site and 5.5 million tons of clay material on a 227 acre public lands site.

The Final EIR/EIS consists of two volumes; Volume I provides responses to the comments received on the Draft EIR/EIS and the mitigation and monitoring program for the proposed project, while Volume II includes additional technical information on the project. The Final EIR/EIS is an extension of the Draft EIR/EIS that was distributed for public review and comment in July, 1992. The Final document plus the Draft document and associated appendices and attachments constitute the complete EIR/EIS for the project.

Major issues identified in the scoping process and/or comments on the Draft EIR/EIS include: geology and the dessication features of the lake bed; soils; seismic issues; cultural and paleontological resources; air quality; hydrology issues including water supply, groundwater aquifer flow, and water quality; noise; biological resources; changes in traffic flow; scenic and visual resources; wilderness study areas; and public health and safety. Volume II of the Final EIR/EIS includes specific studies and associated reports to address the dessication features of the dry lake and their potential impacts on the project, and a human health and ecological risk assessment for the project.
